

For years, the responsible handling of lubricants in the food industry has led to the growing use of H1-registered products on conveyor belts, baking lines and filling plants. The introduction of food-compatible lubricating greases in the catering industry is therefore the next step with regard to the processing chain and the increasingly rising quality standards of large system gastronomes.

## fagiolo GPR 100

fagiolo GPR 100 is a fully synthetic high performance lubricant, developed with high temperature capabilities, water resistance and excellent corrosion protection especially for applications in the gastronomy and food industrie. Its excellent creep and penetration properties provide long-lasting contact surface protection. Micro-recesses are filled and the finest gaps are perfectly lubricated. fagiolo GPR 100 is based on the high-quality lubricants of LUBRIPLATE LUBRICANTS® and, thanks to its NSF-H1 registration, is ideally suited for the protection of all moving parts.

With our food compatible and tasteless fagiolo lubricants you protect your gastronomic equipment against unnecessary wear and effectively seal the lubricated areas against external influences and particles. When manufacturing our products, quality and responsibility towards the product and the customer comes first. As one of the market leaders in the food industry, we use LUBRIPLATE LUBRICANTS® food grade greases.

## fagiolo professional line

- | tasteless and odourless
- | free of MOSH and MOAH
- | NSF-H1-registered
- | kosher- and halal-certified

## fagiolo GPR 50

fagiolo GPR 50 is a white silicone based high performance grease with PTFE that is ideal for forging O-rings, brewing groups and plastic parts in the food industry. It carefully seals against coffee grounds, dust and foreign objects from the outside. Thanks to its NSF-H1 registration, our fagiolo GPR 50 is the ideal companion for every technical service employee in the catering industry.

## for application:

- | coffee machines
- | ovens
- | steamers
- | slicers
- | roaster
